Subject Index of Volume 34

- Acetylene**
effect of metal impurities on the growth of micro-coiled carbon fibres by pyrolysis of acetylene L9
vapour-phase formation of micro-coiled carbon fibres using Ni catalyst and PH_3 impurity 47
- Amorphous materials**
X-ray and differential scanning calorimetry study of the crystallization of amorphous $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{13.5}\text{B}_9$ alloy 204
- Aniline**
polymerization of aniline in layered perovskites 175
- Annealing**
dynamic annealing of damage in Ar^+ -implanted GaAs crystals 32
the fractal approach for the evaluation of microdefects in silicon 164
- Band structure calculations**
positron energy levels in narrow gap semiconductors 58
- Bi layer-structured oxide**
fatigue-free $\text{SrBi}_2(\text{Ta}_x\text{Nb}_{1-x})_2\text{O}_9$ ferroelectric thin films L4
- Cadmium sulphide**
large CdS single crystals with a high optical strength 12
- Carbon**
effect of metal impurities on the growth of micro-coiled carbon fibres by pyrolysis of acetylene L9
vapour-phase formation of micro-coiled carbon fibres using Ni catalyst and PH_3 impurity 47
- Ceramics**
a stable resistive transition in Y–Ba–Cu–O above 200 K 147
detailed analysis of the zero critical temperature improvement in $\text{Mn-YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ composites from electrical and structural studies 116
- Cerium oxide**
growth of pure and doped cerium oxide thin film bilayers by pulsed laser deposition 192
- Chemical vapour deposition**
effect of metal impurities on the growth of micro-coiled carbon fibres by pyrolysis of acetylene L9
epitaxially grown β -SiC on Si in the CH_4 – H_2 system by hot filament chemical vapour deposition L13
preparation of micro-coiled TiC fibers by metal impurity-activated chemical vapor deposition 159
vapour-phase formation of micro-coiled carbon fibres using Ni catalyst and PH_3 impurity 47
- Computer simulations**
an investigation of the diffusion and electromigration limited growth mechanism of InP 152
- Contact metallurgy**
stability of W as electrical contact on 6H-SiC: phase relations and interface reactions in the ternary system W–Si–C 224
- Copper**
characterization of TiN films grown by reactive d.c. triode sputtering onto copper substrates 36
- Crystallization**
magnetic and magneto-optical properties of rapid thermal annealing glass/Al/BiGaDyIG double-layer films 53
X-ray and differential scanning calorimetry study of the crystallization of amorphous $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{13.5}\text{B}_9$ alloy 204
- Defect formation**
avoiding end-of-range dislocations in ion-implanted silicon 168
dynamic annealing of damage in Ar^+ -implanted GaAs crystals 32
large CdS single crystals with a high optical strength 12
the fractal approach for the evaluation of microdefects in silicon 164
- Dielectric–ferroelectric**
growth of neodymium lanthanum heptamolybdate mixed crystals in silica gels 138
- Differential scanning calorimetry**
X-ray and differential scanning calorimetry study of the crystallization of amorphous $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{13.5}\text{B}_9$ alloy 204
- Diffusion**
positron energy levels in narrow gap semiconductors 58
- Doping and impurity implantation**
avoiding end-of-range dislocations in ion-implanted silicon 168
- Doping effects**
detailed analysis of the zero critical temperature improvement in $\text{Mn-YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ composites from electrical and structural studies 116
- Epitaxy of thin films**
epitaxially grown β -SiC on Si in the CH_4 – H_2 system by hot filament chemical vapour deposition L13
- Etching**
selective etching of silicon in aqueous KOH 180
- Fatigue-free**
fatigue-free $\text{SrBi}_2(\text{Ta}_x\text{Nb}_{1-x})_2\text{O}_9$ ferroelectric thin films L4
- Ferrites**
electrical transport properties of some substituted nickel ferrites 67
solid phase epitaxial regrowth of $\text{Si}_{1-x}\text{Ge}_x$ layers formed by single-energy Ge^+ , double-energy Si^+ and Ge^+ , and $\text{Ge}^{\#}$
- Ferroelectrics**
fatigue-free $\text{SrBi}_2(\text{Ta}_x\text{Nb}_{1-x})_2\text{O}_9$ ferroelectric thin films L4
- Fibres**
effect of metal impurities on the growth of micro-coiled carbon fibres by pyrolysis of acetylene L9
preparation of micro-coiled TiC fibers by metal impurity-activated chemical vapor deposition 159

- vapour-phase formation of micro-coiled carbon fibres using Ni catalyst and PH_3 impurity 47
- Film deposition
fatigue-free $\text{SrBi}_2(\text{Ta}_x\text{Nb}_{1-x})_2\text{O}_9$ ferroelectric thin films L4
- Franklinite
hydrothermal preparation and characterization of ultrafine powders of ferrite spinels MFe_2O_4 ($\text{M} = \text{Fe}$, Zn and Ni) L1
- Gallium arsenide
a new optical technique for characterization of technological semiconductor wafers 124
dynamic annealing of damage in Ar^+ -implanted GaAs crystals 32
electrical characteristics of amorphous GaAs-n-crystalline Si heterojunctions 27
- Garnet films
magnetic and magneto-optical properties of rapid thermal annealing glass/Al/BiGaDyIG double-layer films 53
- Gel growth
growth of neodymium lanthanum heptamolybdate mixed crystals in silica gels 138
- Glass
synthesis and properties of phosphate dosimeter glasses 216
- Growth mechanism
an investigation of the diffusion and electromigration limited growth mechanism of InP 152
- Heptamolybdates
growth of neodymium lanthanum heptamolybdate mixed crystals in silica gels 138
- Heterojunctions
electrical characteristics of amorphous GaAs-n-crystalline Si heterojunctions 27
- High temperature superconductivity
activation energies in superconducting high temperature ceramics 132
- Homogeneity
large CdS single crystals with a high optical strength 12
- Hydrothermal preparation
hydrothermal preparation and characterization of ultrafine powders of ferrite spinels MFe_2O_4 ($\text{M} = \text{Fe}$, Zn and Ni) L1
- Indium phosphide
a new optical technique for characterization of technological semiconductor wafers 124
an investigation of the diffusion and electromigration limited growth mechanism of InP 152
- Interface reactions
stability of W as electrical contact on 6H-SiC: phase relations and interface reactions in the ternary system W-Si-C 224
- Ion implantation
dynamic annealing of damage in Ar^+ -implanted GaAs crystals 32
- Ionic conduction
experimental investigations on a sodium-ion-conducting polymer electrolyte based on poly(ethylene oxide) complexed with NaPF_6 18
- Iron oxide films
preparation and characterization of iron oxide films by the excimer laser ablation of poly(ferric methacrylate) 188
- Laser processing
preparation and characterization of iron oxide films by the excimer laser ablation of poly(ferric methacrylate) 188
- Lattice spacing
structural relaxation in silicon at low temperatures 220
- Layered perovskites
polymerization of aniline in layered perovskites 175
- Lead telluride
the effect of various thermal treatments on supercooling of PbTe melts 199
- Liquid phase electroepitaxy
an investigation of the diffusion and electromigration limited growth mechanism of InP 152
- Lithium tungstate
X-ray and thermogravimetric studies of hydrated Li_2WO_4 7
- Magnetic measurements
activation energies in superconducting high temperature ceramics 132
- Magnetite
Letter Hydrothermal preparation and characterization of ultrafine powders of ferrite spinels MFe_2O_4 ($\text{M} = \text{Fe}$, Zn and Ni) L1
- Magneto-optical properties
magnetic and magneto-optical properties of rapid thermal annealing glass/Al/BiGaDyIG double-layer films 53
- Magnetostrictive sensor
the relationship between microstructure and magnetoelastic response in the magnetostrictive amorphous alloy $\text{Co}_{47.4}\text{Fe}_{31.6}\text{Si}_2\text{B}_{19}$ after magnetic field annealing 1
- Manganese
detailed analysis of the zero critical temperature improvement in $\text{Mn-YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ composites from electrical and structural studies 116
- Meissner effect
activation energies in superconducting high temperature ceramics 132
- Melt structure
the effect of various thermal treatments on supercooling of PbTe melts 199
- Mixed crystals
growth of neodymium lanthanum heptamolybdate mixed crystals in silica gels 138
- Nickel ferrites
electrical transport properties of some substituted nickel ferrites 67
solid phase epitaxial regrowth of $\text{Si}_{1-x}\text{Ge}_x$ layers formed by single-energy Ge^+ , double-energy Si^+ and Ge^+ , and Ge and Ge^{2+} ion implantation 42
- Ni-Ti
control composition study of sputtered Ni-Ti shape memory alloy film 112
- Ohmic metal contacts
a critical review of ohmic and rectifying contacts for silicon carbide 83
- Optical properties
large CdS single crystals with a high optical strength 12
- Overheating
the effect of various thermal treatments on supercooling of PbTe melts 199
- Oxides
synthesis and properties of phosphate dosimeter glasses 216
- Phosphorus
synthesis and properties of phosphate dosimeter glasses 216
- Phosphorus diffusion
influence of extended defects and native impurities on external gettering in polycrystalline silicon 210

- Poly(ethylene) oxide
experimental investigations on a sodium-ion-conducting polymer electrolyte based on poly(ethylene oxide) complexed with NaPF_6 18
- Polyaniline
polymerization of aniline in layered perovskites 175
- Polycrystalline silicon
influence of extended defects and native impurities on external gettering in polycrystalline silicon 210
- Polymer electrolyte
experimental investigations on a sodium-ion-conducting polymer electrolyte based on poly(ethylene oxide) complexed with NaPF_6 18
- Polymerization
polymerization of aniline in layered perovskites 175
- Polymers
preparation and characterization of iron oxide films by the excimer laser ablation of poly(ferric methacrylate) 188
- Positrons
positron energy levels in narrow gap semiconductors 58
- Pulsed laser deposition
growth of pure and doped cerium oxide thin film bilayers by pulsed laser deposition 192
- Raman spectroscopy
preparation and characterization of iron oxide films by the excimer laser ablation of poly(ferric methacrylate) 188
- Rapid thermal annealing
magnetic and magneto-optical properties of rapid thermal annealing glass/Al/BiGaDyIG double-layer films 53
- Rayleigh scattering
a new optical technique for characterization of technological semiconductor wafers 124
- Rectifying metal contacts
a critical review of ohmic and rectifying contacts for silicon carbide 83
- Selective etching
selective etching of silicon in aqueous KOH 180
- Semiconductors
a critical review of ohmic and rectifying contacts for silicon carbide 83
a new optical technique for characterization of technological semiconductor wafers 124
positron energy levels in narrow gap semiconductors 58
- Shape memory alloy
control composition study of sputtered Ni-Ti shape memory alloy film 112
- Silicon
a new optical technique for characterization of technological semiconductor wafers 124
avoiding end-of-range dislocations in ion-implanted silicon 168
electrical characteristics of amorphous GaAs-n-crystalline Si heterojunctions 27
epitaxially grown β -SiC on Si in the CH_4 - H_2 system by hot filament chemical vapour deposition L13
influence of extended defects and native impurities on external gettering in polycrystalline silicon 210
selective etching of silicon in aqueous KOH 180
structural relaxation in silicon at low temperatures 220
the fractal approach for the evaluation of microdefects in silicon 164
- Silicon carbide
a critical review of ohmic and rectifying contacts for silicon carbide 83
epitaxially grown β -SiC on Si in the CH_4 - H_2 system by hot filament chemical vapour deposition L13
- stability of W as electrical contact on 6H-SiC: phase relations and interface reactions in the ternary system W-Si-C 224
- Silver
synthesis and properties of phosphate dosimeter glasses 216
- Small polarons
electrical transport properties of some substituted nickel ferrites 67
solid phase epitaxial regrowth of $\text{Si}_{1-x}\text{Ge}_x$ layers formed by single-energy Ge^+ , double-energy Si^+ and Ge^+ , and Ge^{2+} ion implantation 42
- Sputtering
control composition study of sputtered Ni-Ti shape memory alloy film 112
- Stoichiometry
large CdS single crystals with a high optical strength 12
- Superconductivity
a stable resistive transition in Y-Ba-Cu-O above 200 K 147
densification and high critical current densities in bulk $\text{YBa}_2\text{Cu}_3\text{O}_{7-y}$ superconductor by the solid state reaction technique 106
detailed analysis of the zero critical temperature improvement in Mn-YBa₂Cu₃O_{7- δ} composites from electrical and structural studies 116
- Superconductivity perovskites
a stable resistive transition in Y-Ba-Cu-O above 200 K 147
activation energies in superconducting high temperature ceramics 132
- Supercooling
the effect of various thermal treatments on supercooling of PbTe melts 199
- Surface and interface states
positron energy levels in narrow gap semiconductors 58
- Surface melting
a stable resistive transition in Y-Ba-Cu-O above 200 K 147
- Surface photovoltage
the fractal approach for the evaluation of microdefects in silicon 164
- Thermogravimetry
X-ray and thermogravimetric studies of hydrated Li_2WO_4 7
- Thin films
control composition study of sputtered Ni-Ti shape memory alloy film 112
growth of pure and doped cerium oxide thin film bilayers by pulsed laser deposition 192
- Titanium carbide
preparation of micro-coiled TiC fibers by metal impurity-activated chemical vapor deposition 159
- Titanium nitride
characterization of TiN films grown by reactive d.c. triode sputtering onto copper substrates 36
- Transport properties
electrical transport properties of some substituted nickel ferrites 67
solid phase epitaxial regrowth of $\text{Si}_{1-x}\text{Ge}_x$ layers formed by single-energy Ge^+ , double-energy Si^+ and Ge^+ , and Ge^{2+} ion implantation 42
- Trevorite
hydrothermal preparation and characterization of ultrafine powders of ferrite spinels MFe_2O_4 (M = Fe, Zn and Ni) L1
- Triode sputtering
characterization of TiN films grown by reactive d.c. triode sputtering onto copper substrates 36
- Tungsten
stability of W as electrical contact on 6H-SiC: phase relations and interface reactions in the ternary system W-Si-C 224

X-ray diffraction

growth of pure and doped cerium oxide thin film bilayers by pulsed laser deposition 192

structural relaxation in silicon at low temperatures 220

X-ray and thermogravimetric studies of hydrated Li_2WO_4 7

X-ray spectroscopy

X-ray and differential scanning calorimetry study of the crystallization of amorphous $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{13.5}\text{B}_9$ alloy 204

XPS

preparation and characterization of iron oxide films by the excimer laser ablation of poly(ferric methacrylate) 188

YBCO

thin films, Optical conductivity, Superconducting gap Unexpected behaviour of IR reflectivity of a $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ oriented film 74
